## Summary of Qualifications

---

4th year BS Information Technology student at STI College with hands-on experience in web development and application system creation gained through academic projects. Skilled in using SQL, Node.js, Firebase, and Figma to design and build functional web and application systems, and in collaborating with teams to deliver projects on schedule. Seeking an OJT/internship opportunity where I can apply my development and problem-solving skills while continuing to learn.

## Key Skills and Competencies

---

### Web Development

- Built responsive web pages and interfaces using HTML, CSS, and JavaScript for academic projects
- Developed functional web systems based on project requirements and presented them to professors

### Backend and Application Systems

- Created application systems using **Node.js** for server-side logic and functionality
- Connected applications to **Firebase** for data storage and real-time features

### Database and Queries

- Wrote and managed SQL queries to store, retrieve, and organize project data

### U**I/UX Design**

Created application systems using **Node.js** for server-side logic and functionality

- Connected applications to **Firebase** for data storage and real-time features

### Tools and Software

- Proficient in Node.js, Firebase, SQL, Figma, HTML, CSS, JavaScript
- Familiar with Git for version control

### Communication and Teamwork

- Collaborated with team members on academic projects, dividing tasks and meeting deadlines
- Presented finished application systems to professors and classmates

## EDUCATION

---

Bachelor of Science in Information Technology, STI College

*STI West Negros University*
*2026-2027*
